

VBS - Automatic Lines

LN

Exclusive "on line" group with automatic panning equipment for production of loaves, rolls and buns.

The unique on line equipment that grants a wide variety of production without the necessity of rotating parts of it.

The extreme flexibility of an equipment in a simple move: by a rotation of a handwheel it passes from the production of "bocconcini" into "banana"

Then by means of the regulation of multi-positions belt it is possible to pass from one production to the other (loaves, rolls, ciabatta) in a friendly way without technical compromises to get an optimum bread forming.

The VBS BG, provided as standard with the automatic panning of the product, is a modular machine and can be customized adding several ancillary equipment: dough feeding hopper, loaf

PANE	PESO PASTA	PRODUZIONE	POTENZA	PESO	TENSIONE
tipo	gr	kg/h	Kw	Kg	
Filone - 1 fila	350	595	7,5	2230	V400/3N~/50Hz
