

CSC SARTORI
THE MECHANICS BEHIND THE FLAVOR

BREAD & PIZZA SOLUTIONS - MADE IN ITALY

SENZA PASSIONE SAREMMO SOLO MACCHINE

Without a heart, we would only be machines

1971

Today

FROM TECHNOLOGY
TO FLAVOR

Taste is a harmony of elements. It is the result of a process that transforms and gives life.

Prior to this, there is a CSC Sartori machine. And even before - since 1971 - there is our **passion and our technology.**

INGEGNERI

Technical drawing details: Top left gear icon, top right gear icon, dimension 125.000, dimension 125.000, angle 12.5°, dimension 45.6.

The aroma comes from a perfect mechanism.

This philosophy inspires each of our projects.
We create bread-making solutions with the
final fragrance and flavor in mind.

Not mere machines, but instead flexible
systems which respect the food, harmonize
production times and assure maximum
productivity.

For everyone. Bakers and industries.

MECHANICS

AUTOMATION

Two forms of expertise that blend together.

Precision and dynamism.
Reliability and modularity.
Each product is a combination of these values,
as it's the outcome of a long experience as
well as of a thorough competence in the
mechanics and automation fields.

The end result?

Maximum customization and integration
between devices.

Technology at maximum power.

Under stress, they perform at their best. They are our machines for large installations: state-of-the-art technology and mechanics mixed together by an expertise in design.

The result?

Versatile and customizable instruments that are ready for automated production lines. **Ready to deliver top performance.**

Optical guards

Dough delivery belts

Dough cutting system

Internal flour duster

Piston locking system

Dough dividing piston

Tilting hopper

Perfection, in all regards.

The precision is in the details. To find out,
just look inside one of our machines.
Or appreciate the end result: doughs that
are dainty and in well-defined shapes.

Machines that think big.

Flexibility comes with the machine itself. It's in its DNA. And it's in ours. This allows us to offer solutions that are state-of-the-art and versatile. Perfect for today. **Ready for tomorrow.**

In input and output: our machines can process various types of dough and churn out numerous products. Quickly, because there are no mechanical substitutions when switching from one process to another. With ultimate care, as the flow of dough minimizes stress. And with extreme precision, because we use state-of-the-art technologies, flour dusters and systems with minimal weight tolerance.

Precise today, always versatile.

Automatic baking tin loader

Expandable transport belts

Dough roller

Hopper with additional flour dusters

Empty baking tin storage system

Dough recovery tray

7" touch-screen monitor

Stainless steel panels
